up to 175MH/150 HPS

L5994DS
22-3/4" x 46-1/4"
up to 400MH/HPS

NEW - zero% uplight unit

ELA now employs a full-cutoff, **zero%** uplight optical system in its family of fixtures. To meet the demands of **dark-sky** and **LEED certification requirements**, the new Mediterranean models are constructed with a horizontal, segmented reflector (Type III or V), and a tempered horizontal lens (clear or frosted). The new version is available in two sizes and is constructed with a twist lock cap for tool-less access to the ballast, along with a hinged hood for easy re-lamping. The new models offer energy efficient lamp sources and are available for post, multi-arm, and wall mount configurations.
