Authenticity - The *Copenhagen* is an authentic replica of a 19th century gas lantern. Where many choose to imitate history by making only indentations in the metal, ELA punches holes so it not only looks like a vent, it is a vent. Venting lets heat out, which extends your lantern's life. It requires more skill and takes longer to make it this way, but that's what you can expect from ELA.

Remember!

ELA builds custom lighting. We are able to modify our standard products, apply special finishes, or provide an assortment of lenses. Contact your ELA Rep. or the factory for details.
